

## **Clearing Java's Cache in Windows XP:**

1. Click on the Start button at the bottom of Windows XP
2. Click on Control Panel
3. Double Click the Java icon. It is an outlined square with a coffee cup and orange steam coming out of it.
4. Under the General tab, at the bottom under Temporary Internet Files, click on Settings.
5. In the Temporary Internet Settings window that pops up, click on Delete Files. Check off both Applications and Applets and Trace and Log Files and click OK. This window should go away once it is clear.
6. Click OK on the Temporary Internet Settings window.
7. Click Apply and OK on the Java Control Panel Window.
8. Close out of your Control Panel window.
