Briefly describe the activities you observed:

In your health care shadowing hours you **must**:

- Shadow a health care professional (licensed/registered or certified in their field)
- Observe patient care activities
- Develop an understanding of the role of this health care professional in patient care
- Identify the relationship between pharmacists and this health care professional

In reflecting upon your health care shadowing activity, which of the following did you do?

- Observed patient care of a diverse group of patients
- Communicated with other health care professionals. What type(s)? _____
- Interacted with other student health care professionals. What type(s)? _____
- Observed interprofessional teamwork
- Gained a sense of professionalism in the health care setting
- Applied classroom knowledge to real-life situations
- Observed elements of cultural competency in patient care

In the box below briefly justify your selections:
